Career Objective

Computer Science undergraduate specializing in Data Science with hands-on experience in full-stack and backend development using Node.js, Express.js, React, MongoDB, and MySQL. Strong foundation in Data Structures and Algorithms, OOP, DBMS, REST API development, and Git. Experienced in building real-time applications, integrating third-party APIs, and developing scalable backend services.

Education

Pranveer Singh Institute of Technology <i>B.Tech in Computer Science (Data Science)</i>	2023 – Present 80.164%
Grain Chamber Public School – CBSE <i>Class XII</i>	2022 84%
Grain Chamber Public School – CBSE <i>Class X</i>	2020 92.04%

Technical Skills

Programming Languages: Java, Python, JavaScript
Backend Development: Node.js, Express.js, REST APIs, API Design, Server-side Development
Frontend Development: React.js, HTML, CSS
Databases: MySQL, MongoDB, Mongoose
Core Concepts: Data Structures & Algorithms, OOP, DBMS, Operating Systems
Tools & Platforms: Git, GitHub
AI/ML: Scikit-learn, Pandas, NLP, Generative AI, Agentic AI

Experience

Upzenix Technologies <i>Full Stack Developer Intern</i>	2026 Remote
- Contributed to full-stack web development involving frontend interfaces, backend services, REST APIs, and application functionality. - Implemented and integrated application features while following modular development and version-control practices. - Worked with Git and GitHub for source control, code management, debugging, and feature development. - Identified application issues, tested functionality, and implemented improvements based on project requirements.	

Projects

Raksha Signal – Smart Emergency Alert & Safety System <i>Node.js, Express.js, MongoDB, Mongoose, Socket.io, JavaScript, Google Maps API</i>	GitHub Live Demo
- Designed and developed a real-time SOS system with REST APIs, live GPS tracking, and event-driven communication using Node.js and Express.js. - Implemented Socket.io-based real-time location updates, enabling connected users to receive continuous emergency-location information. - Designed MongoDB schemas using Mongoose for SOS and user data and structured the backend using modular routes and middleware. - Integrated Google Maps API to dynamically identify nearby hospitals and police stations based on the user's location.	
Krishi Help – AI Crop Recommendation System <i>Node.js, Express.js, MongoDB, Python, Scikit-learn, Pandas</i>	GitHub Live Demo
- Developed a crop recommendation system using Python, Scikit-learn, and Pandas, achieving 85% prediction accuracy on the project dataset. - Built REST APIs using Node.js and Express.js to connect the machine learning model with the application backend. - Designed MongoDB data storage for application and recommendation-related information and applied feature engineering for improved predictions. - Developed a web interface enabling users to receive personalized crop recommendations.	

Achievements

- Solved 400+ problems on LeetCode, demonstrating strong proficiency in Data Structures, Algorithms, and problem-solving.
- Secured 2nd place in Code and Stack organized by AlgoClub, PSIT.
- Secured 3rd place in Robotex at the national level.

Certifications

- Google Cloud Gen AI Academy – DevOps & Automation Track
- Google Cloud Gen AI Academy – Security Track
- Oracle Cloud Infrastructure 2025 Certified AI Foundation Associate
- AWS Cloud Practitioner Essentials
- Oracle Cloud Infrastructure 2026 Agentic AI Certified Foundations Associate
- HTML & CSS Certification – Infosys
